

Quality Engineer

Hoyer, Denmark

Do you want to be part of a well-qualified and dedicated international quality team? And do you like working in a busy working environment with various tasks? Then Hoyer is the right place for you!

At Hoyer we are looking for an electro technical Quality Engineer to support the further development of our quality concept. As a global supplier of electric motors, quality assurance is central and in the position as Quality Engineer you directly contribute to the achievement of the goals. You will be a part of our quality team with colleagues from both China and Denmark. You will be stationed in Denmark, but expected to have approximately 15-40 travelling days per year.

The work tasks include mainly inspections and root cause analysis in the RMA workshop and in the warehouse. Approximately 30% of your time will be spent on administration and documentation at the office desk. You will work closely together with your colleagues in the Quality team and other departments such as the warehouse, technical department and sales.

Work tasks and areas of responsibility:

- Direct contact person to both customers and OEM suppliers in terms of quality.
- Root cause analysis on motors.
- Shop floor investigations.
- Deviation reporting in RMA system including 8D reporting to customers and OEM suppliers.
- Participate in supplier development.
- Participate in customer and third part audits.
- Collection, development and maintenance of data material, statistics etc.
- Contribute to the maintenance of existing quality management system according to ISO 9001 and ISO 14001.

Skills and experience:

We expect you to have experience from a similar position working in a quality department and experience or knowledge about electric motor manufacturing is a definite plus. You are not afraid to get your hands dirty and you have workshop experience. Furthermore, you are defined by the following:

- You are preferably Electrical Engineer, Mechanical or Quality Engineer with electrical knowledge or similar.
- Good technical knowledge.
- Surface treatment experience is an advantage
- High drive and commitment – Desire to improve or keep the level of quality.
- Experience with problem-solving tools in areas such as Lean and Six Sigma.

Hoyer strives to create profit from being the preferred logistic partner for electric motors and standard power transmission products in Europe and Asia.

It is our mission to successfully form close partnerships with our customers, our suppliers and our employees, because we believe this will enable us to provide the highest possible level of service and thereby add most value to all stakeholders.

- Proactive and enterprising.
- Task and result oriented.
- Structured and organized.
- Good communication skills and fluent in English.

You are proactive in seeking out information and knowledge. You take pride in being updated on trends in the world of quality and the industry in general. You are resourceful and give inputs that can create value for the customer and for Hoyer. Finally you contribute to a good atmosphere with a positive and open behavior.

We offer:

- Reputable company
- Good teamwork between all staff
- Good employee relations
- A versatile position with great opportunities

We look forward to receiving your application and CV. Please attach the files as Word or PDF and mark the e-mail "Quality Engineer". Apply as soon as possible via job@hoyermotors.com.
